

Industrial Hemp Seed – 2018 Compliant Varieties

Plant Industry

The NDA does not promote the use of select hemp seed varieties. This list simply illustrates which varieties have been grown within the state and have been deemed eligible for industrial hemp. The NDA does not endorse the use of one variety over the other and will not recommend varieties for growers. This list in no way declares that each variety will maintain a THC concentration of <0.3%. It merely identifies the varieties that have been grown and have tested in accordance with state/federal law within the respective production regions. Bear in mind that compliance testing was conducted specifically for the Δ9-THC molecule and does not account for THC-A or Total potential THC, post-decarboxylation.

#	Varietal Name	Designation
1	Abacus	2019 Eligible
2	Acid Rock	2019 Eligible
3	BaOx	2019 Eligible
4	Berry Blossom	2019 Eligible
